Company

ASSAY OFFICE

Registration Application

Thank you for choosing the Goldsmiths' Company Assay Office for your hallmarking requirements

Part of the renowned Goldsmiths' Company, our internationally-recognised leopard's head hallmark guarantees the quality of precious metal content for the benefit of manufacturers, importers, retailers and consumers. We test and hallmark jewellery and silverware in line with full UK regulations, and provide unparalleled customer care and service.

Registration of a sponsor's mark

A hallmark must include certain elements, including a sponsor's mark (also known as a maker's mark or name mark). This unique symbol provides a traceable link to the source of an article. The UK Hallmarking Act 1973 requires a new sponsor's mark to be registered at an assay office before hallmarking can commence.

A sponsor's mark comprises a combination of two to five letters enclosed in a surrounding shield. Different shield designs are available to allow sponsors with the same initials to be distinguished.

In the case of private individuals the letters used must be his or her initials. In the case of a company, the first letter of the words forming the name of the company must be used, or the first and last letters if the name is only one word.

Eg: Mr. Robert John Brown – RJB or RB
J.S. Brown Ltd. – JSB or JSBLD
J. Brown Ltd. – JBLD
Browns – Bs

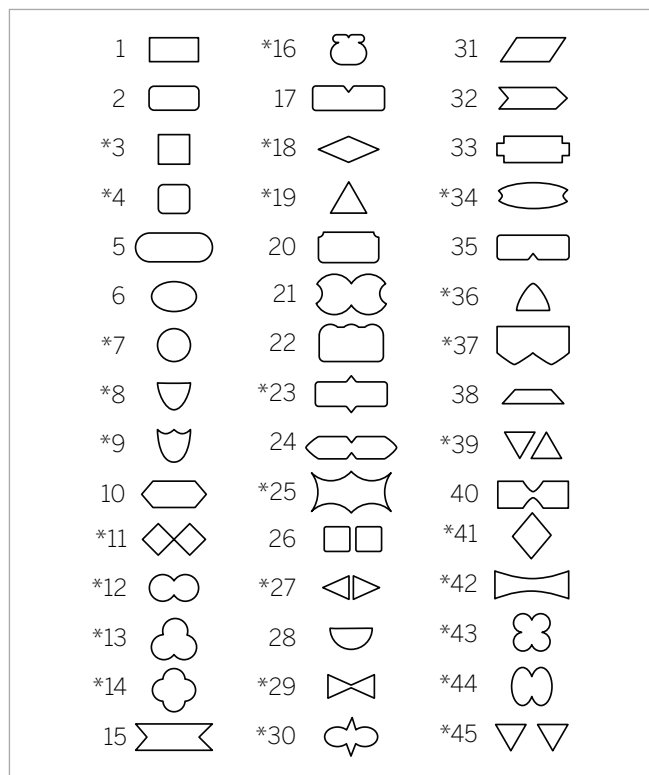

Price of registration

The price of registration is £72.00 (including VAT). The sponsor's mark is registered for a period of ten years after which time it can be renewed. Renewal notices are automatically sent out as the ten-year registration expiry date approaches*.

*Should we fail to hear from you within two months of expiry we reserve the right to securely dispose of your punches and any costs to remake punches will be at the customer's expense. It is therefore imperative that you inform us of any address changes.

Shield designs

Note: Shield designs marked * are not suitable when applied below 1mm (size K)

Obtaining your punch

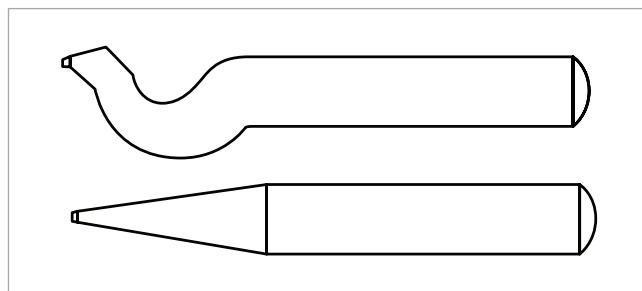

A punch comprising the sponsor's mark is needed before hallmarking can take place.

Punches can be supplied by the Goldsmiths' Company Assay Office or by the customer. For the latter, any punch or other equipment intended to be used for striking the sponsor's mark must be forwarded to the Goldsmiths' Company Assay Office for approval and registration prior to use.

Two key decisions need to be made when ordering a punch:

Shank type

Punches can be cut on two different types of shank, known as straight or swan neck. The latter is required for marking the inside of rings where the geometry of a straight shank prevents the punch head getting to the marking area. Swan neck shanks can usually be used on other articles, making them the ideal choice if only one punch is to be ordered.

Mark size

The size of a punch should reflect the nature of the articles intended to be submitted for hallmarking: a large punch may be unsuitable for delicate items. Guidance on sizes for different items is shown in the table below. The maximum size of a straight punch is 6mm in height (size A).

The maximum size for a swan neck punch is 1mm (size K). If you are unsure about what size you should choose please contact us for guidance.

Size	Height	USE
A	6.00mm	Large silver holloware
B	5.00mm	
C	4.25mm	
D	3.50mm	Small silver holloware
E	3.00mm	
F	2.50mm	
G	2.00mm	
H	1.75mm	Napkin rings, frames
I	1.50mm	
J	1.25mm	
K	1.00mm	Solid bangles, large jewellery
L	0.75mm	Rings
M	0.50mm	Small jewellery, rings
